

## **Free Spiritual Seekers Webcast**

Are you a Spiritual Seeker? Your answer will be “yes” if you are like me. I know that there is more to life than what I have already experienced. I feel the need to expand my conscious awareness through seeking answers to questions that keeps popping up regarding the meaning of my existence. By now most of the answers that I seek comes from the unseen forces of love and light, beyond the realm of the five senses.

This is a pre-show to our Conscious Creator monthly event. I offer to you a web portal where we Spiritual Seekers can come to be part of a reality that there is a Great Shift in Consciousness in progress for us as individuals and for planet earth. We are aware that changing the status quo in our personal lives for the better is first and foremost. What is best for Spiritual Seeker is good for planet earth.

We Spiritual Seekers are feeling the force that is coming from within that is moving us to make changes in our way of life. We are moved to consciously create in the energy of love. We are seeking a pathway to heal our four bodies, physical, mental, emotional and spiritual.

For one hour every month come and join me in this free video webcast speaking on a topic regarding matters of healing to evolve your soul journey. It is a path to discovering what you are truly seeking.

Daily meditation is a must do on a daily basis for the serious Spiritual Seekers. In a recent meditation of mine, I was shown a reality that we can look forward to, and are already moving towards. We are moving our consciousness from a 3<sup>rd</sup> dimensions, ying-yang matrix of opposites to a 4<sup>th</sup> dimension consciousness where balance rules. This movement is giving us the opportunity to age our soul, thereby evolve/elevate our consciousness to another level.

Meditations are my portal to other worlds of consciousness. In my travels to the 4<sup>th</sup> dimension I saw how it was a level of reality where we are free to exercise our creative powers in truth, trust and passion (without fear) to consciously create a society that nurtures people on many levels of light in expanding the consciousness of planet earth.

A 4<sup>th</sup> dimensional reality offers us a conscious awareness that space/time is relative to our individual soul journey. The condition of our body is a direct result of our thoughts and the choices we make. Healing diseases, aging, death and dying are necessary experiences to evolve the soul. We as Spiritual Seekers will move closer to the truth that we have full control our soul journey with our thoughts. Our financial situation also is a direct result of our thoughts. We will know again that peace and prosperity are by-products of the love we express towards self and the world. We have full control with our hearts and minds working together as one to achieve our needs and desires that fulfill our spiritual purpose of life.

As Spiritual Seekers we now understand the basics of creation. However the time for wishing for things to manifest no longer works. This Great Shift in Consciousness that we came on earth to be part of is pressing us to be conscious creator in love. Spiritual Seekers free webinar program will give you the awareness on the importance of becoming a Conscious Creator, the process of aging of the soul to evolve/elevate your realm of light.

My webinar programs are designed to expand your conscious awareness and consider going beyond the third dimension thinking to heal the challenges of life.

Blessings  
Kahu
